CONTENTS

SECTION A—VOL. LXX

No. 1—July 1969

PAGE

Isotopes of Uranium and Radium in Indian Rivers . . . . . Suman G. Bhat and S. Krishnaswamy 1

Sorption-Desorption Hysteresis in Fibrous Silica Gel (Santocel C) with Isomeric Monohydric Aliphatic Alcohols . . . . . K. Subba Rao and Bhagwan Das 18

Electron Spin Resonance of Cr^{5+} in $CaWO_4$ . . . . . K. V. Lingam, P. G. Nair and B. Venkataraman 29

Influence of Temperature on the Photometric Determination of Silicon in Ferrous Materials . . . . K. S. R. Krishnaiah and M. S. Raju 42

A Kinetic Study of the Reaction of Diols with Hydrogen Halides . . . . . P. S. Radhakrishnamurti and T. P. Visvanathan 47

No. 2—August 1969

ESR of CaS : Mn^{2+} : A Case with Zero Cubic Field Splitting . . . . . P. G. Nair, K. V. Lingam and V. G. Machwe 53

Boundary Layer along the Initial Length of a Flat Plate at Zero Incidence with Homogeneous Suction . . . . . S. S. Singh and R. C. Choudhary 59

Laminar Jet of a Compressible Pseudo-Plastic Fluid . . . . . N. L. Kalathia and R. K. Jain 73

Alkylation and Aralkylation of N-Heterocycles. Part II. Methylation and Benzylation of 5 (or 6)-Methyl Benzimidazoles . . . . . K. Kondal Reddy and N. V. Subba Rao 81

On Some Identities of H-Function . . . . . P. Anandani 89

The Kinetics of the Decarboxylation of Malonic Acid in Esters . . . . . R. Gopalan and I. M. Mathai 92

Meijer's G-Function and the Temperature in a Nonhomogeneous Bar . . . . . S. D. Bajpai 99

Certain Series Involving Products of Laguerre Polynomials . . . . . H. M. Srivastava 102

No. 3—September 1969

PAGE

The Lifetimes of Positrons in Oxides of Arsenic and Antimony . . . . . V. G. Kulkarni, R. G. Lagu, Girish Chandra and B. V. Thosar 107

Validity of Lorentz Invariance at Extremely High Energies . . . . . A. Subramanian and R. H. Vatcha 114

Indirect Polarographic Determination of Stability Constants. IV. Thiosulphate Complexes . . . . . S. C. Saraiya and A. K. Sundaram 120

Force Constants, Generalised Mean Square Amplitudes of Vibration, Shrinkage Constants and Coriolis Coupling Coefficients of GeH_3CCH and GeD_3CCH . . K. Venkateswarlu, V. Malathy Devi and A. Natarajan 126

On Two-Body Channels in the Interactions of Negative Pions with Protons in the Few GeV Region . . . . . S. K. Tuli 140

Effect of Cross—Velocity on the Stability of Superposed Fluids . . . . . S. C. Agrawal and G. S. Agrawal 150

No. 4—October 1969

Oxidation of α-Hydroxy Acids and Derivatives by Cr (VI) Oxide . . . . . S. Sundaram and N. Venkatasubramanian 157

Heat Transfer in Channel Flow of a Micropolar Fluid . . . . . Miss Renuka Rajagopalan and K. S. Bhatnagar 165

The Slow Stationary Flow of a Viscous Liquid about Porous Spheroids . . . . . N. V. Sambasiva Rao and S. K. Lakshmana Rao 177

Relativistic Estimates of X-Ray K-Line Intensity Ratios: Calculations including Retardation and Screenings . . T. V. Krishnan and Amar Nath Nigam 189

No. 5—November 1969

Cosmic Ray Nuclei of Charge $Z \geqslant 3$ During the Period of Low Solar Activity . . . K. C. Anand, S. Biswas, P. J. Lavakare, S. Ramadurai, . . N. Sreenivasan, V. S. Bhatia, V. S. Chohan and S. D. Pabbi 201

Spectral Studies on Some Organic Complexes of Uranyl Ion. Part I. Absorption Spectra of Pyridine Complexes . D. N. Sanwal and D. D. Pant 221

No. 5—November 1969—*Contd.*

PAGE

Slowly Oscillating Functions and a Generalization of Quasi-Monotone Coefficients . . . . . Charles S. Rees 234

Three-Dimensional Periodic Boundary Layers . . . . . C. L. Narayana and N. R. Subramanian 243

No. 6—December 1969

Energy Spectrum and the Absolute Flux of Various Celestial X-Ray Sources . . . U. R. Rao, E. V. Chitnis, A. S. Prakasa Rao and U. B. Jayanthi 257

Piezo-Rotatory Coefficients and Stress-Induced Optical Activity . . . . . G. S. Ranganath and S. Ramaseshan 275

Alkylation and Aralkylation of N-Heterocycles. Part III. Methylation and Benzylation of 5 (or 6)-Chloro Benzimidazoles . . . . . K. Kondal Reddy and N. V. Subba Rao 292

Raman and Infrared Spectra and Normal Vibrations of N-Methylpropionamide and N-Deuterated N-Methyl Propionamide . . . . . P. Usha Bai and K. Venkata Ramiah 300
